QORECAPTURE

SMARTER PROCESSES

An intelligent, fully automated document capture and management system.

Whether you intend to scan paper documents or capture electronic files for integration into your enterprise Document Management (EDRMS) system, QoreCapture offers you a seamless capture method. This means you can apply consistent logic to all your documents, whatever their source.

Even more benefits!
Here are some additional features:

Virtual printers

Print to QoreCapture from any application (manually or automatically).

Your documents will be converted to PDF format for processing by QoreCapture.

Depending on the virtual printer selected, documents can be processed manually by a user or recognized and processed automatically by QoreCapture. A virtual printer is also available or the AS/400 to handle all SCS format printing.

Emails

Capture your emails automatically by redirecting an email box to QoreCapture for automatic processing, or capture your emails manually using our Office 365 add-ons.

QoreCapture can capture the email, process text content or attachments separately.
